

# Kiron.university

Kiron counts over 80 entrepreneurs, designers, IT specialists, psychologists, and experts in education. + 250 volunteers (25 in Belgium only) and more than 50 supporting professors Kiron opened on October 15th 2015 with 1000 students.

## A Success Story

Kiron had large success with thousands of applicants for our university program; and currently is finishing the first semester of studies with 1300 refugee students.

# Looking for Sustainability

In spite of our success we want to develop a more sustainable model that could match the needs of **Belgian** society.

# Problem: Lack of Developers

Europe expects a deficit of

**900.000**

software developers by 2020;  
20.000 in **Belgium** only.  
**11 Billion Euro Loss!**

## Our Solution

Kiron CodeSchool trains refugees to become skilled software developers, through an innovative blended learning program with a curriculum fitting the needs of our partner companies.

# Creating the best IT Professionals together!

## 3 Steps to Success:

**1. IT Needs Assessment & Develop Fitting Curriculum**

**2. Execute Learning Track**

**3. Interview Potential Candidates**

## Step 1: IT Needs Assessment & Develop Fitting Curriculum

As an initial step we will perform an assessment of your internal IT needs and create a customized program for the students in order to educate them in the skillsets that your company needs.

## Step 2: Execute Learning Track

Once the study program has been decided we will work with content providers, volunteers (external or from the organization) to execute 8-12 months program.

## Step 3: Interview Potential Candidates

# Get New Talent!

You get to interview candidates with a very specific skillset tailored to your corporation's needs.

# The Program Timeline

**Selection**

**Programming Courses**  
2 to 4 months

**First Project**  
2 to 4 months

**Internship**  
2 months

**Interview  
&  
Hire**

Language School

Online courses

Mentoring &  
Support

# Phase 1: Candidate selection

The first phase is dedicated to the selection process. We will review the student's background and assess their problem solving capabilities

40% Tenacity

40% Problem solver

20% Technical Background

## Phase 2: Blended Learning

This phase is dedicated to learn the technologies you have selected with our online content and weekly class meeting with our coaches.

## Phase 3: First Project

The first project should be oriented to gain more confidence and experience on the type of work the students will be doing in your company

## Phase 4: Internship

We will create with the assessment of your engineers, a project related with the work of the company. Our students will build it together with our team.

# What else we provide

Kiron CodeSchool get a range of tools and direct personal support developed by Kiron to empower them and improve their performance and skill learning throughout the program.

## MOOCS

Our courses are supplemented via edX and Coursera

Courses are produced individually and include a variety of videos, readings, quizzes, peer reviewed assignments.

## kiron interact

Our Platform allows students to better interact with Tutors & Peers, exchange of additional material & Information, building Study-Groups and Forums
